

## PRODUCT GUIDANCE SHEET

### SHAMWAX ECO

#### OVERVIEW:

A powerful vehicle shampoo containing a technical polymer wax emulsion to give great cleaning and leave a protective wax layer to improve shine.

#### APPLICATIONS:

Suitable for manual washing of cars, vans, lorries, caravans, motor homes and even boats. Safe for use on stainless steel, chromed steel, aluminium, gelcoat, fibreglass, plastic, polycarbonate, glass and painted metals.

#### DIRECTIONS FOR USE:

Wet the surface fully before use; add 80-150ml shampoo per 8 litres of water. Agitate the surface with a sponge/wash mitt or brush.

Rinse well with clean water and dry with a flexi-blade, flunky or chamois leather for a brilliant smear free finish.

#### HEALTH & SAFETY:

NOTE: COSHH assessments should be performed in line with current legislation to determine the required precautions.

IMPORTANT NOTE: Under the recently introduced CLP Legislation for the labelling and classification of chemical formulations, if a product is classified as causing damage to eyes it must show the pictogram below which is the same as that used for corrosive products. However this does not mean the product is corrosive. We appreciate this is ambiguous and may cause confusion but this is a fault of the legislation. Our Shamwax ECO is NOT corrosive and is safe to use on virtually any hard surface.

#### DANGER

Causes serious eye damage.

Keep out of reach of children.

Wear protective gloves/protective clothing/eye protection/face protection.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

**See MSDS for further information.**
