

## PRODUCT GUIDANCE SHEET

### ALLOY GLEAM

#### OVERVIEW:

A non-acidic and non-corrosive but powerful alloy wheel cleaner. Most alloy wheel cleaners are based on strong acids which may cause corrosion and damage to wheels, brake discs, callipers and paintwork. Acidic cleaners can also damage concrete and tarmac when rinsed off.

Our cleaner uses a combination of detergents and stain removers in an alkaline formulation to remove grease, brake dust, dirt and road film without corroding parts or damaging paintwork.

Gives fantastic cleaning performance without the extreme hazards associated with the strongly acidic or caustic cleaners commonly used.

#### APPLICATIONS:

For the cleaning of steel and alloy wheels.

#### DIRECTIONS FOR USE:

Use neat.

Rinse the wheel with clean water.

Apply the cleaner generously with a trigger spray and allow to penetrate for up to 5 minutes.

Do not allow to dry.

Very heavy soiling may require agitation using a sponge or suitable wheel brush.

Rinse off thoroughly with clean water.

#### HEALTH & SAFETY:

NOTE: COSHH assessments should be performed in line with current legislation to determine the required precautions.

#### WARNING

Causes skin irritation.

Causes serious eye irritation.

Keep out of reach of children.

IF ON SKIN: Wash with plenty of soap and water.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

**See MSDS for further information.**
